In The Beginning

In the beginning classes like Physiology and Optics caused much frustration. Toward the end we had the same feelings about Advanced Lighting and Public Health, not to mention the more serious affairs of life like finding the perfect job or mate! It's amazing what can be endured.

The following pages are to enjoy and to evoke some laughter and good memories. We've included some historical graphics reflecting how times have changed. And now, a look at the four years we've shared together.

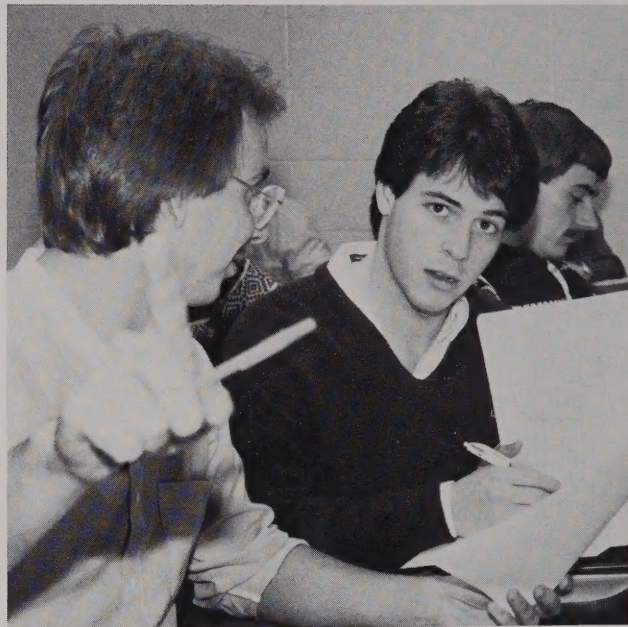

ACADEMIA

Inside 352 West Tenth

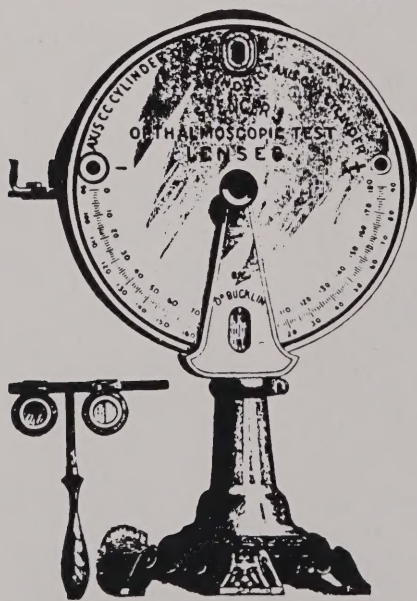

Go on, Randy, tell them how well that Brut after shave works for you.

Can't you see I'm busy!

Spencer's Ophthalmoscopic Test Lenses.

WILL DETECT ALL VISUAL DEFECTS.

A scientific and practical instrument, for detecting all optical defects of the eye and determining the lenses needed for their correction.

Use this instrument in adjusting Spectacles and Eye-Glasses in all cases of

MYOPIA, or Near Sight, — **HYPEROPIA**, or Far Sight, — **PRESBYOPIA**, or Old Sight, and **ASTIGMATISM**, or Poor Sight.

Caused by oval eyes which causes some figures on a clock dial, at fifteen feet, to look darker than others.

This instrument has the following advantages:

I. It is very ornamental and more attractive than any other instrument.

II. It measures all optical defects of the eye more rapidly and accurately than any other instrument.

III. It is the only instrument where the error due to the distance of the lenses from the eye is properly compensated for.

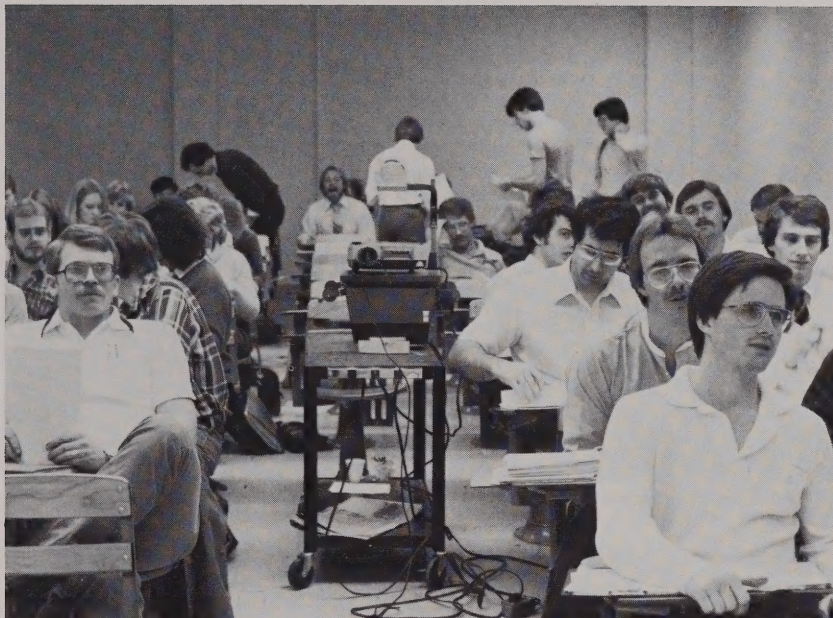

IV. It is the only instrument which, in addition to measuring the optical defect of the eye, measures instantly and in a satisfactory manner the exact distance between the pupils, and determines any weakness in the muscles which move the eyes.

V. The axis of the concave and convex cylindrical lenses are presented to the eye in the position they are most frequently required, 180 and 90 degrees respectively.

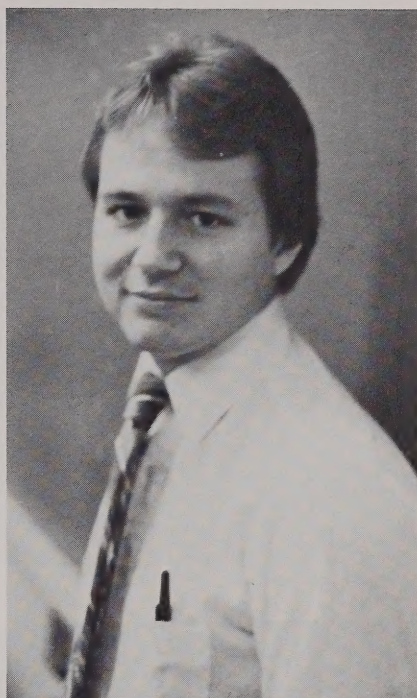

VI. It is much cheaper than any other instrument of the kind.

Price reduced to.\$25.00

A present Automated Refractor costs over \$16,000.

O.K., Everyone, take your assigned seats.

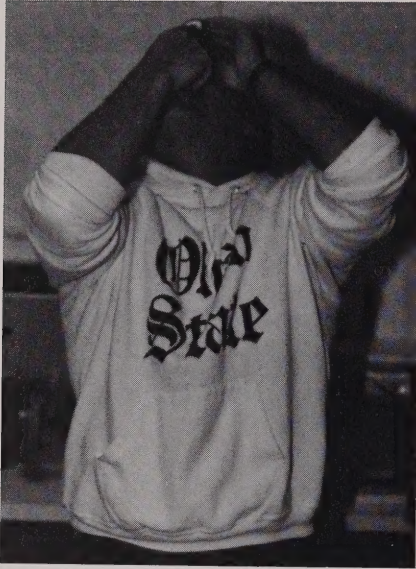

"I wouldn't buy that computer."

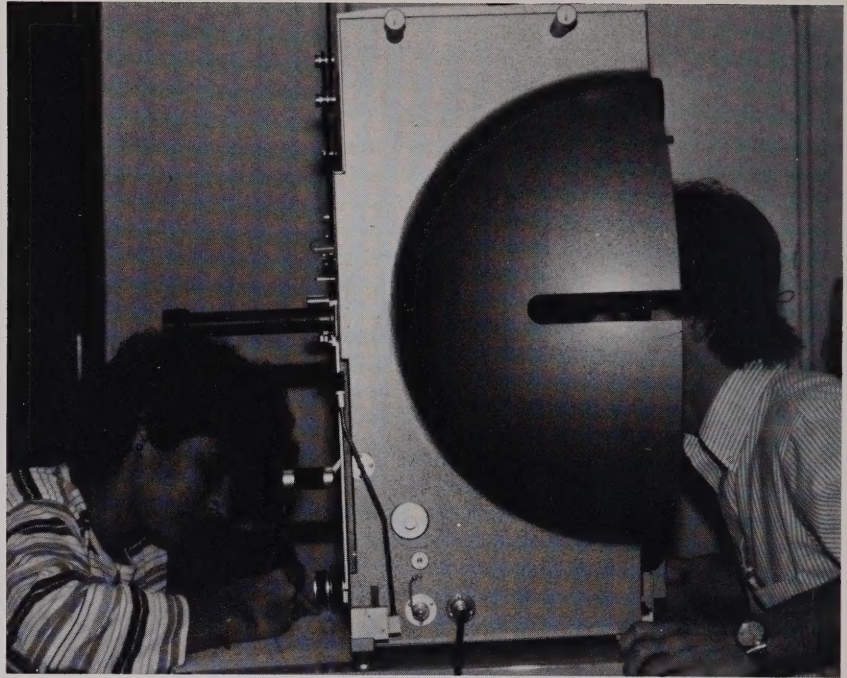

A view from David Hettler's perspective.

Dr. Hill passes on another tidbit of information.

Great lathe marks in that secondary curve.

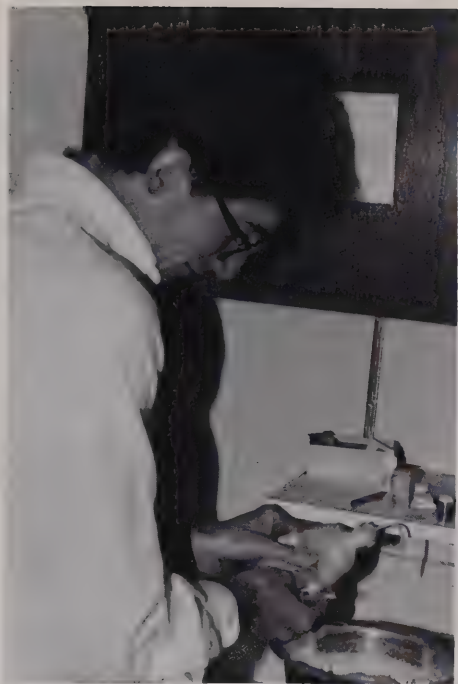

Susan shows complete patient concern, as usual.

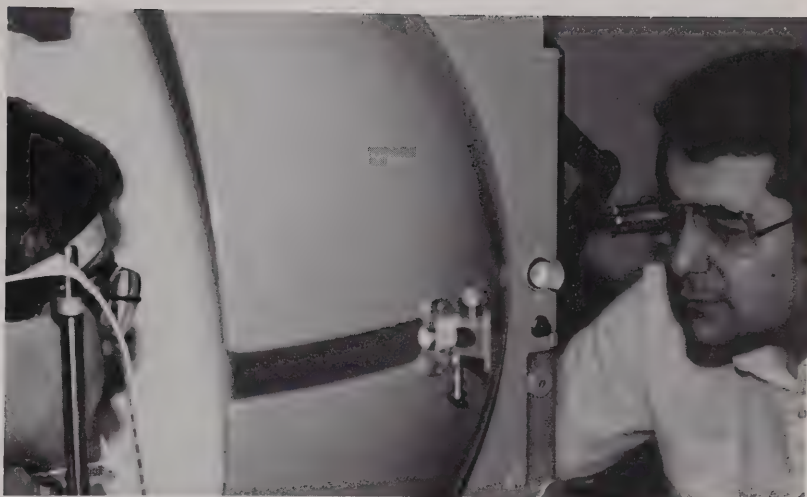

Modified Tom.

An invention that could prove useful now is found in Baker's Patent Reversible Spectacles. These eliminative the need for two pair of eyeglasses. The design allows for upside down wear by swiveling the temple at the endpiece.

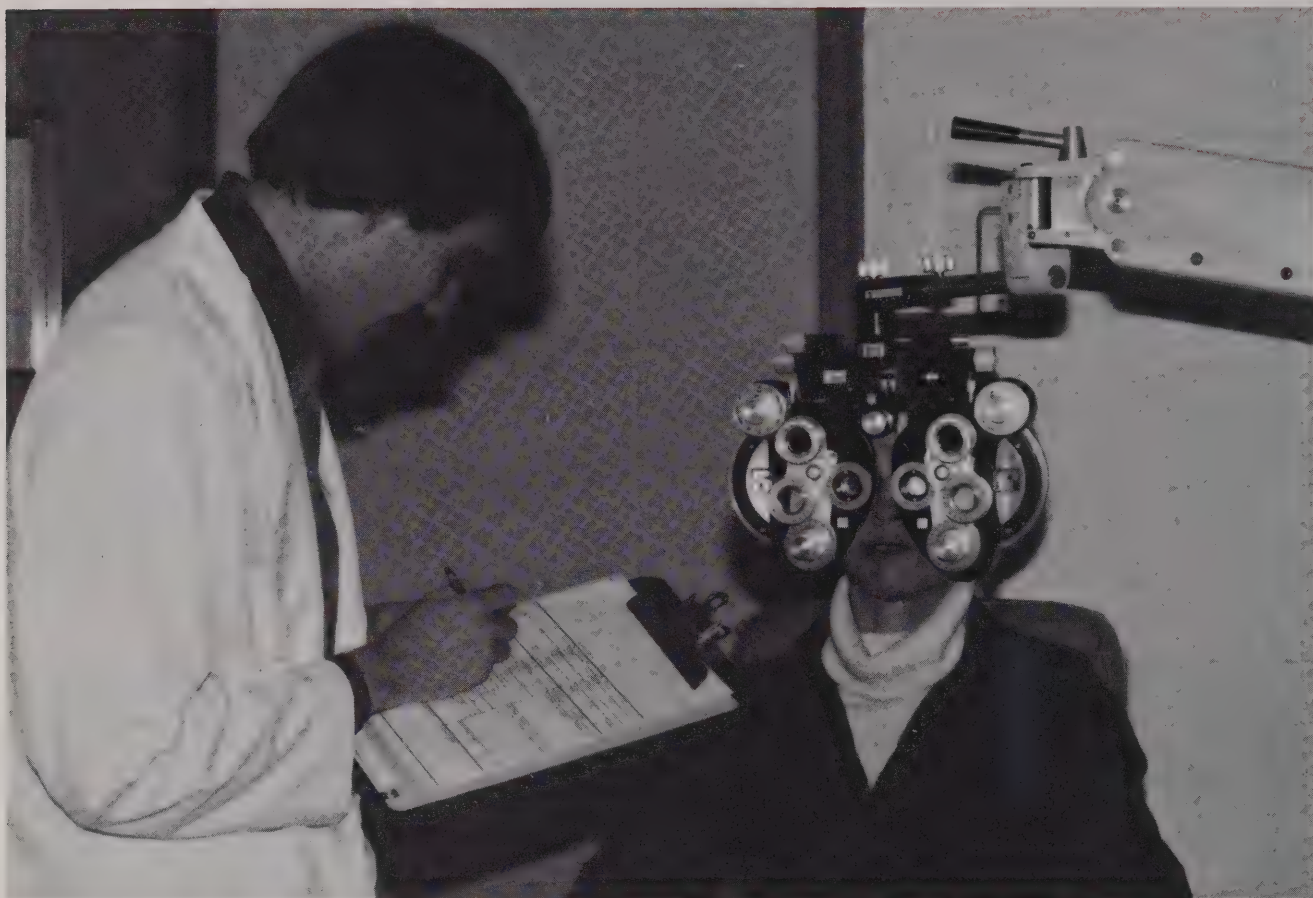

Mike, why so tense?

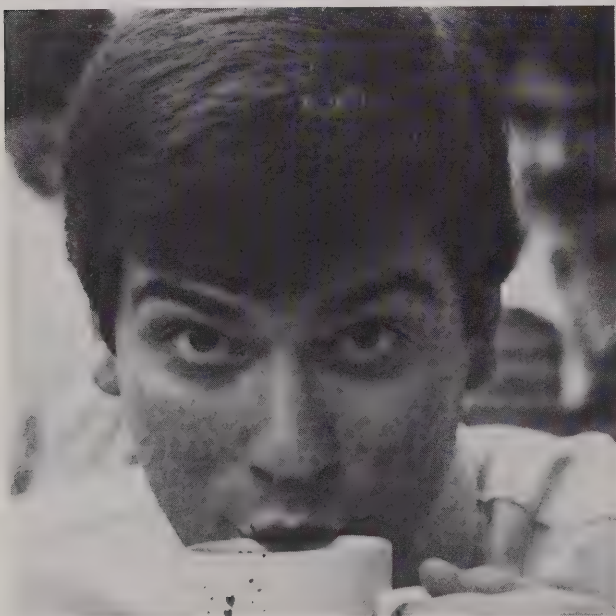

"What a pretty eye you have!"

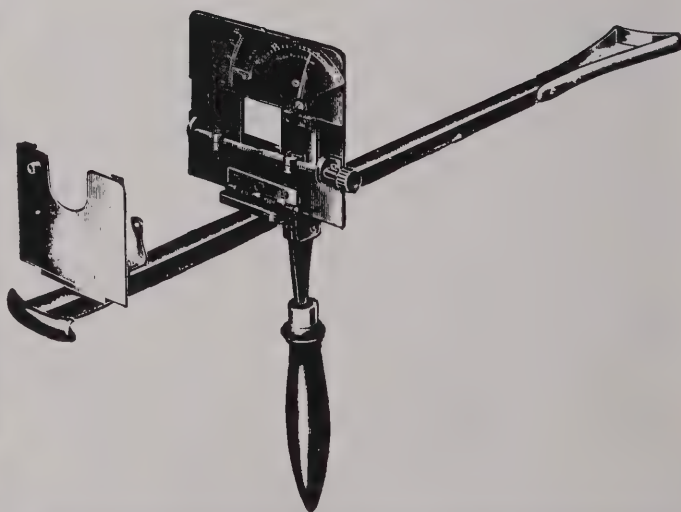

Marty is trying to sell Sun T.V.'s new perimeter arc.

"Are you presently taking any type of birth control?"

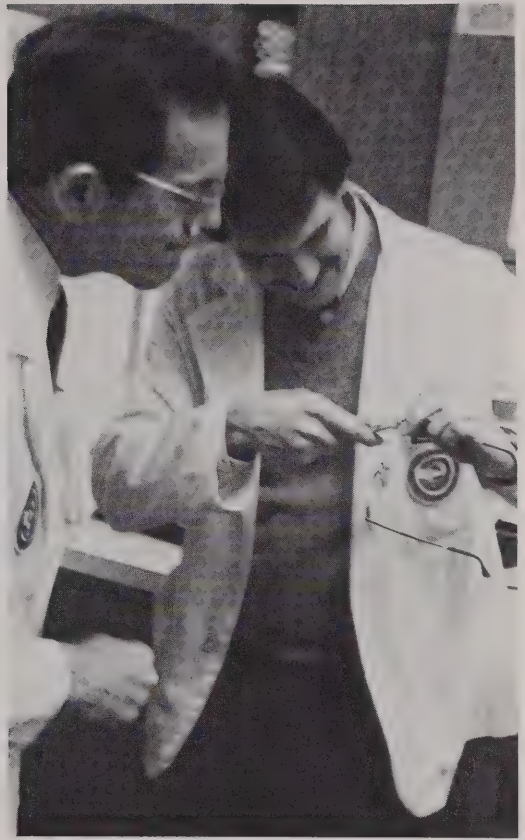

A little caffeine to get through the day.

Diaphragm Test. This instrument is designed to provide a natural means of determining the presence and the quality of binocular vision. The newest model is the Aperture Rule.

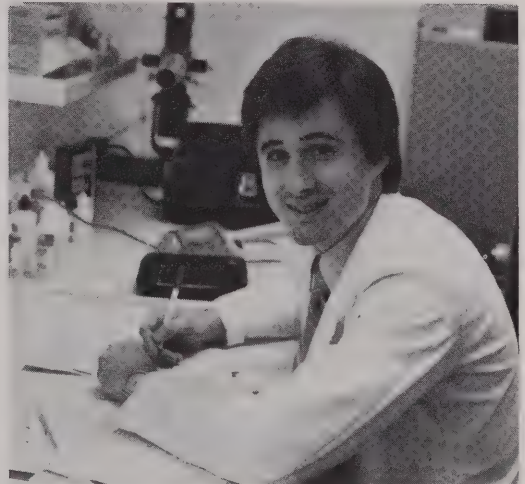

Another "No Show."

Don't put pressure on that hinge, Greg.

"I definitely think it's glaucoma."

Contact Lens Clinic makes it all worthwhile.

School Screenings & Spare Time

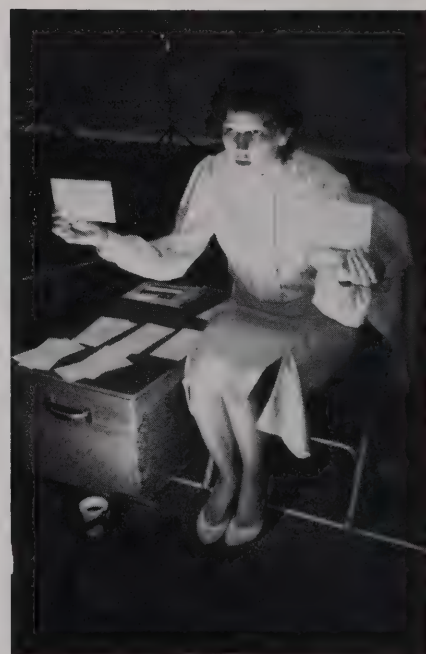

"Now Billy, look right at my light."

Dean Hebbard at the 00A Convention.

Dave and Dan, finders of another pygmy casket.

Is V.T. really voodoo?

The S.O.A.P. approach.

Tim, calm and relaxed before a Polasky exam.

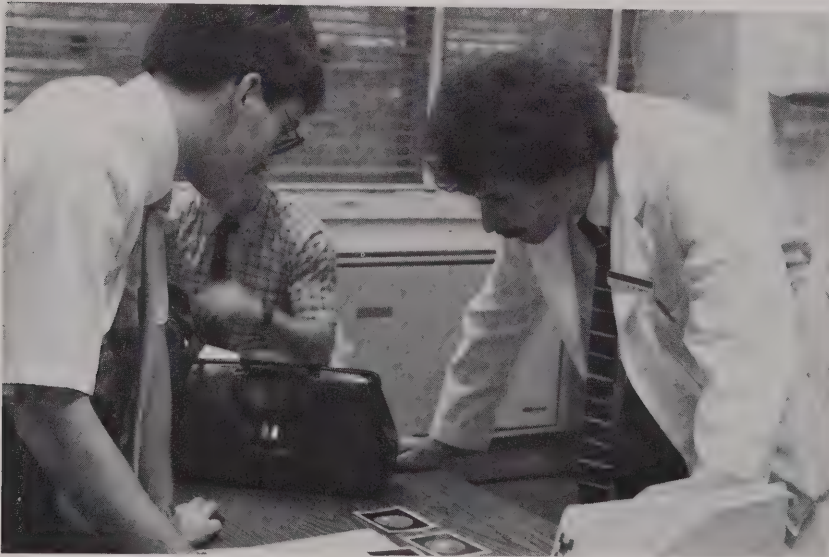

How many for Dunkin Donuts?

What's Your Specialty This Quarter?

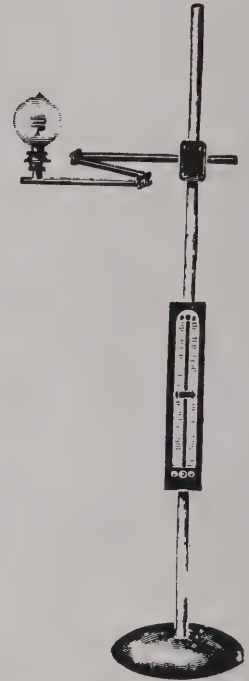

This piece of equipment may look unfamiliar to most. Now a collector's item, it has been replaced by our present day Ophthalmic Stand.

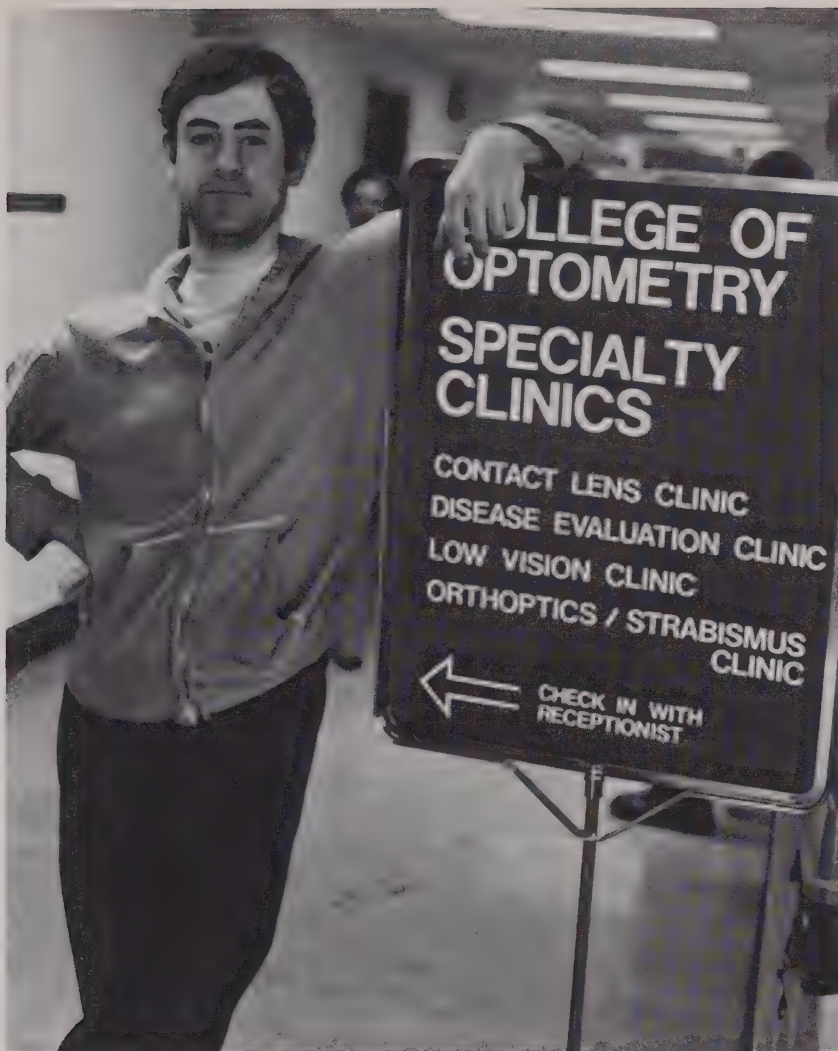

What a loaded panel!

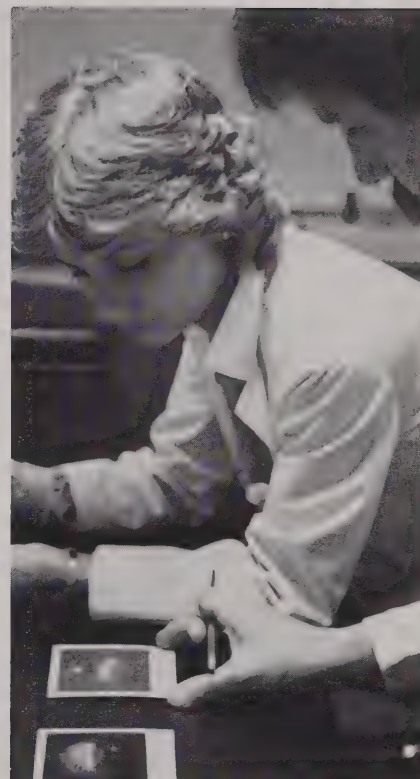

"Definitely Histo!"

"Doc-tor An-Dras-ko, you have a phone call in the Con-tact Lens re-cep-tion ar-e-a."

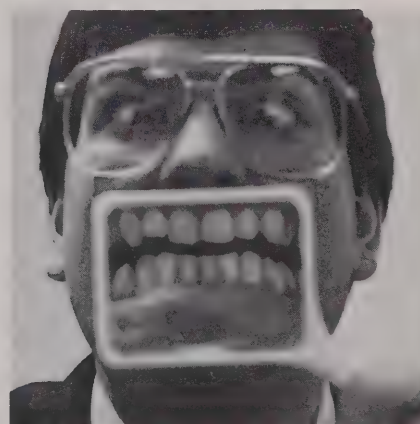

"I can handle anything."

"My diagnosis is ..."

"No signs of solar retinitis here, Al."

"So, you're a Low Vision Dentist?"

"Does anything ever disappear?"

This Portable Perimeter was used to evaluate visual fields. The Stereocampimeter is its modern counterpart.

The complete optometric exam.

"Get me the Dean!"

The Kids' Viewpoint

The "A" Team.

"Do you know how to hop?"

"That's right, it's a horseeee."

Just another smooth talking lab rep.

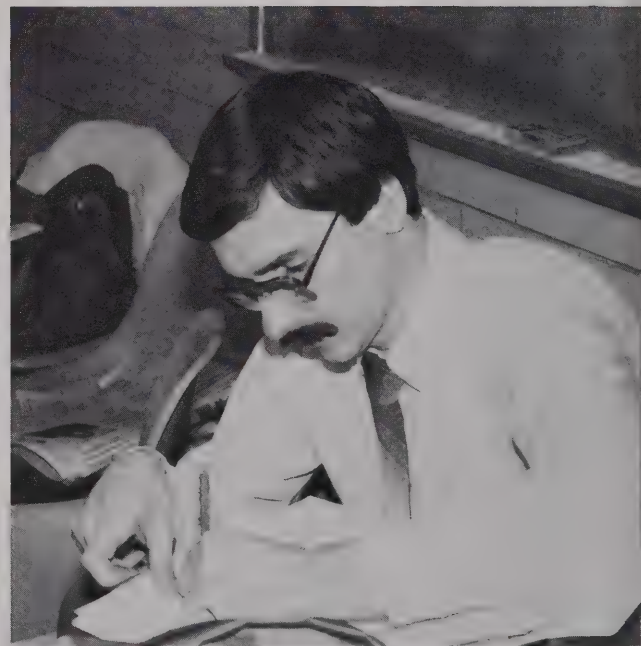

I guess we'll never know the answer.

"I bet you had eggs, bacon and toast for breakfast."

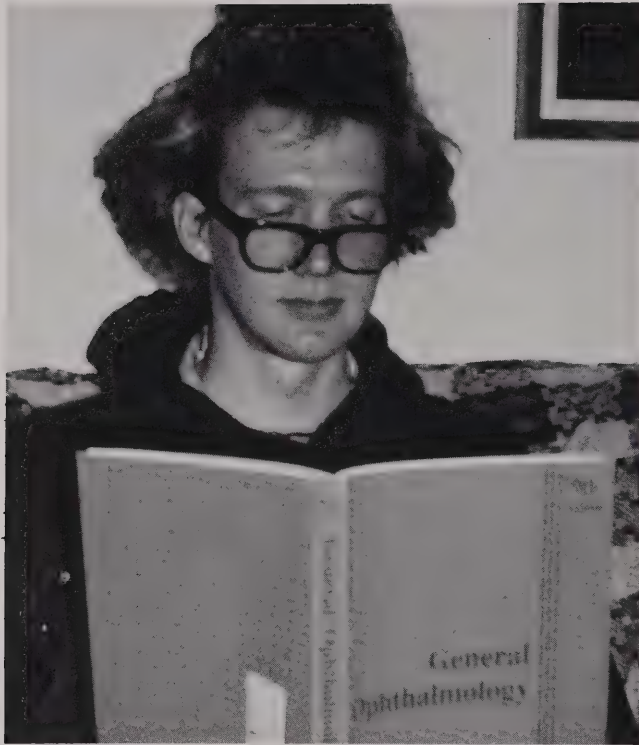

Rick's pride and joy.

Contact Lens Summary Sheet — number 1,486.

AFTER HOURS

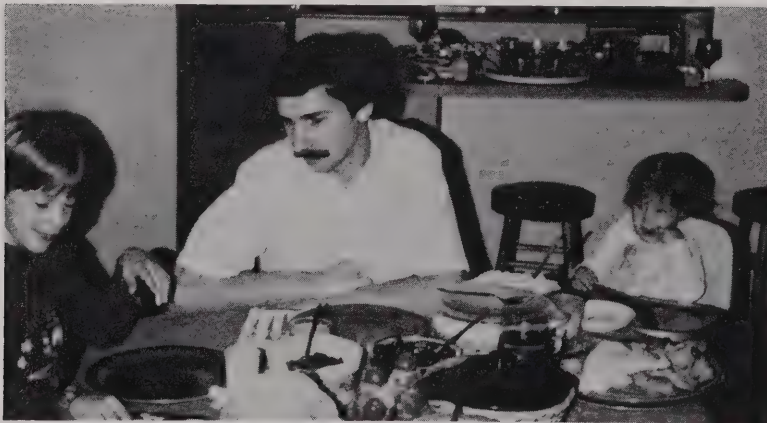

A true gunner.

"Randy, you're so rugged!"

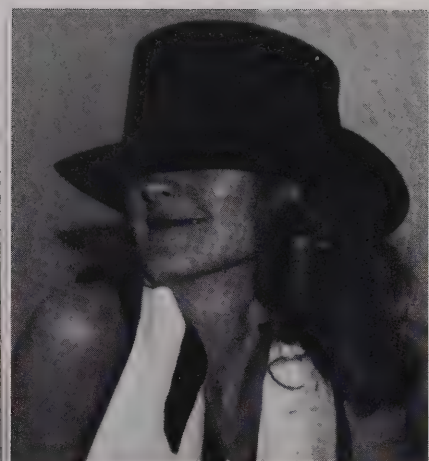

There's more to life than Optometry

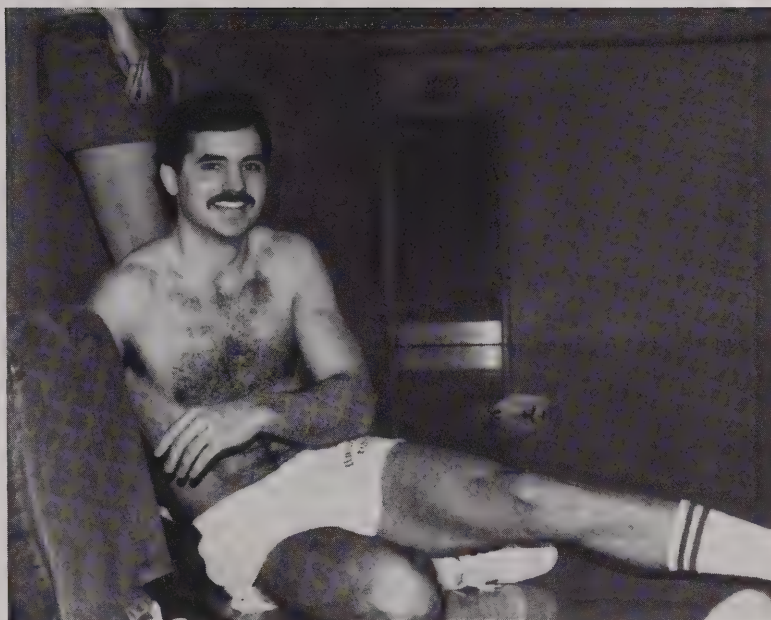

Here's Marcy on another one of her expeditions.

Outside 352 West Tenth

The future Mrs. Hicks.

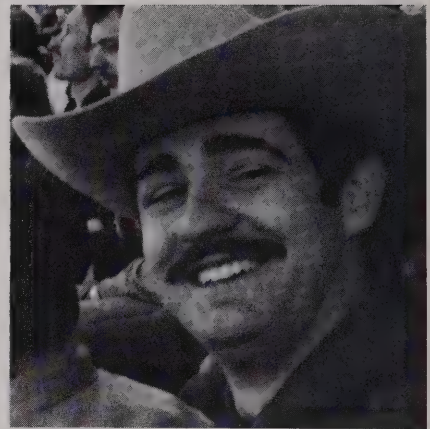

Before, or after?

Enjoying life!

O.K., Bill, Let's hear it!

A Cornhusker turned Buckeye.

HARNESS' EYE BATTERY

(PATENTED).
THE "WONDER CURE" OF THE 19th CENTURY.
A MARVELLOUS INVENTION.

**AWAY WITH
EYE-GLASSES
AND
EYE LOTIONS.**

PRICE
12s. 6d.
POST FREE.

By the use of this simple instrument, all the horrible experiences of Leeching, Bleeding, and Surgical Operations are entirely obviated.

**AWAY WITH Leeching,
Bleeding, and
Surgical Operations.**

PRICE
12s. 6d.
POST FREE.

NEW and PAINLESS method of promptly curing all diseases of the Eye, and defective eyesight. Call at 52, OXFORD STREET, LONDON, W., and test the instrument for yourself, free of charge.

REDUCED FAC-SIMILE OF FITNESS' EYE BATTERY. WILL LAST FOR EVER.

HARNESS' EYE BATTERY is perfectly safe to use, even by children of tender years, the application being entirely under the patient's control. HARNESS' EYE BATTERY, in addition to PREVENTING and CURING DISEASES OF THE EYE, will cure asthenopia, and positively RESTORE WEAKNESS OF VISION, whether resulting from advancing age, or from that general nervous prostration which prejudicially affects the optic nerve. It also speedily SPECIALLY REMEDIES THE EYES (Nerve Follicles), so generally complained of by those suffering from early excesses and in a low and nervous state. Such patients will find in HARNESS' EYE BATTERY an absolute remedy for the malady, which is a real and not, as is supposed, an imaginary one, and shows undoubted local manifestation of a debilitated state. HARNESS' EYE BATTERY is sent, carefully packed, with directions for using it, post-free, on receipt of 12s. 6d.

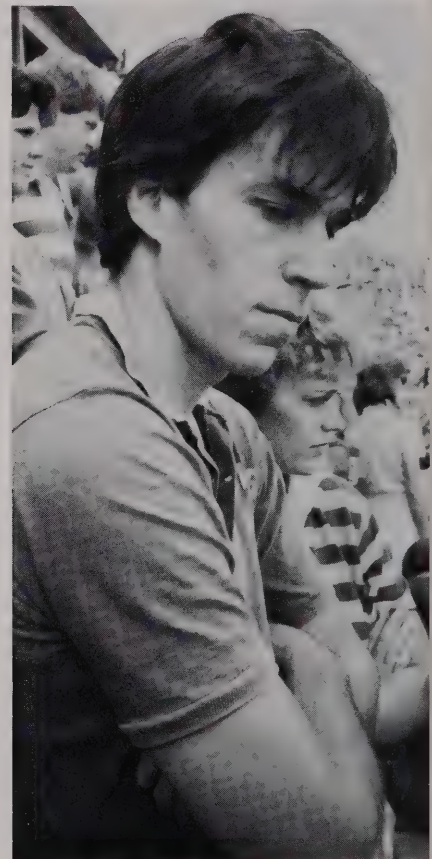

HARNESS' EYE BATTERY is admitted to exercise a rapid influence upon the complex system of nerves, blood-vessels, fluids, and membranes, constituting the most wonderful of Nature's mysterious mechanism. Almost every disease of the eye can now be successfully treated by the systematic use (according to directions) of HARNESS' EYE BATTERY, which can be applied at any time, as is sufficiently portable to be conveniently carried in the pocket, and may be used by any person from infancy to old age, with perfect safety. Stated simply, this is a system of curing diseases and weakness of the eye, and restoring normal acuteness of vision, by assisting Nature, through influencing the circulatory functions to convey to the affected region a sufficient supply of healthy blood, and thus to annihilate the morbid and stagnant conditions which foster and maintain disease.

PAMPHLET POST-FREE.

EYES

SUCCESSFULLY TREATED.

The Medical Battery Co., Ltd., 52, OXFORD ST., LONDON, W.

But Jim, an A- isn't so bad!

Prepared on the Grange range.

The Zeuch crew.

Another rainy afternoon at The Ohio Stadium.

Good things are forever.

Lower, Dee Ann!

"Where's the beef?"

B-O-B-B

Go Bucks!

See you at the screening.

A blossoming romance.

The Best Damn Band in the land!

A simple case of Convergence Insufficiency.

What do you do on your day off?

Spring cleaning at the Bateman household.

Letting Loose!

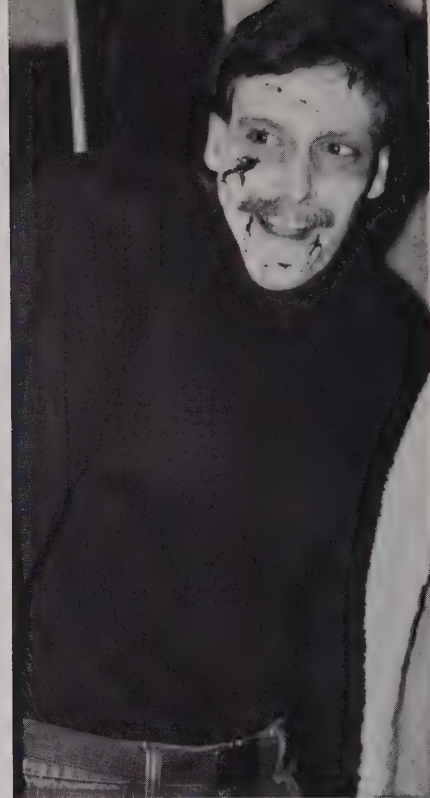

The Dynamic Duo by night.

It's Time To Relax

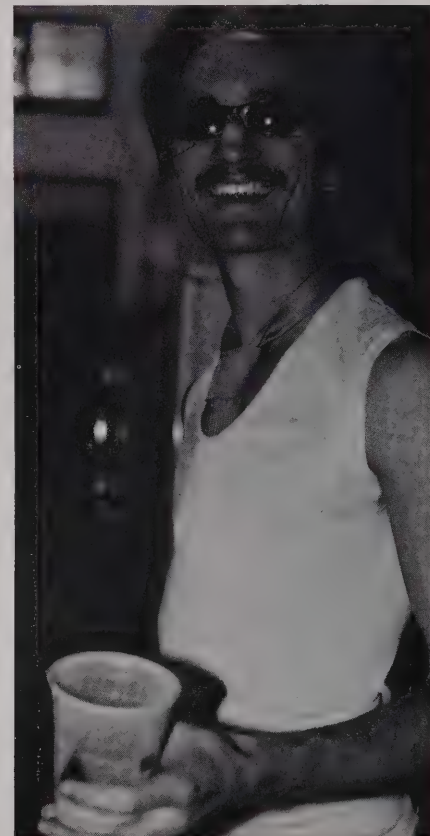

The infamous "400 King."

"Come closer, Darling."

The Dynamic Duo by day.

"Go ahead, make my day!"

"Gag me with a spoon!"

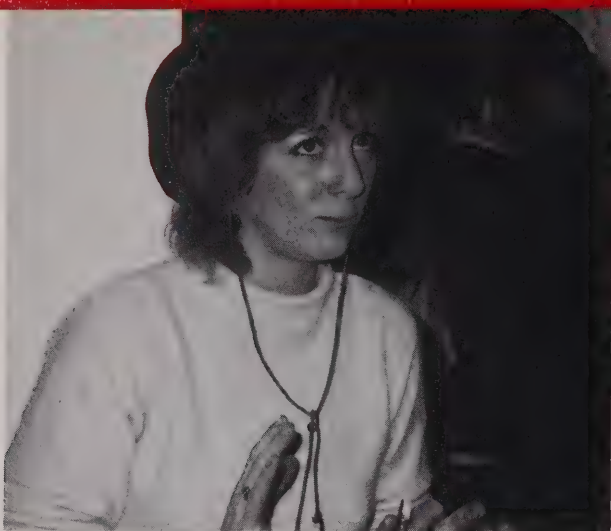

They must be "buzzed!"

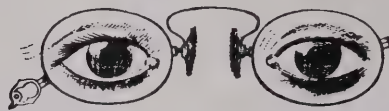

A little kera-to-"cone"-us never hurt anyone.

Clinic Attire

"You won't believe this one!"

EYESIGHT BY MAIL.

Eyes which do not perform their duty should be assisted by the most carefully made spectacles and eye-glasses, fitted by persons of known and well-tried skill. We send to any address our pamphlet giving a description of every good style of spectacle and eye-glass, and also our book of test types and questions, the answers to which will enable us to fit the glasses with great accuracy. Correspondence regarding the sight will receive careful attention.

**JAMES W. QUEEN & CO.,

ENDANGERED SPECIES?

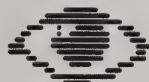

In the face of all the cut-rate "glasses-vendor" competition, is the independent eyecare professional falling by the wayside?

We hope not. Because we at Edward H. Schmidt and Sons know the caring...the personal service...and the attention to top-quality eyecare that only an independent professional can provide.

We believe eyecare is more than selling glasses...and an optical laboratory should do more than fill lens prescriptions. That's why Edward H. Schmidt and Sons provides the independent eyecare professional with services such as training programs...a large selection of professional instruments and a comprehensive service program...dispensary furnishing and design...a vast assortment of frames...and, of course, premium-quality lens work for any prescription, no matter how difficult.

Because, though eyewear fashions may come and go, quality eyecare will never go out of style.

Edward H. Schmidt and Sons...dedicated to the future of the independent eyecare professional for more than half a century.

CONGRATULATIONS TO THE CLASS OF 84 FROM 84 TOPCON

**You've got a lot to be proud of.
You've just completed an exciting
and challenging academic career, and
the best is yet to come.**

**Topcon would like to be a part of that
future. When you're ready to set
up your own practice, there are a few
things we'd like you to remember
about us:**

1

Topcon has an established tradition of manufacturing optical diagnostic instruments of the highest quality and precision. Our instrumentation is used by some of the most respected individuals in private practice, as well as some of our country's finest institutions.

2

We have a standing commitment to always offer you our fine products at a fair and reasonable price.

3

Topcon promises immediate delivery. More often than not, you'll discover that an instrument which you'd normally wait several months to get from another manufacturer, is available within 30 days from Topcon.

If you'd like information on our complete line of products, contact your local Topcon distributor or write to us for free literature.

The
soft toric
lens
preferred
2 to 1.

The
HYDROMARCTM
(etafilcon A) Toric.

A recent independent study* among volume users of soft lenses shows that practitioners who use the HydromarcTM (etafilcon A) Toric Lens prefer it 2 to 1 over any other.

For these good reasons:

- Unique slab-off design results in exceptional stability.
- **Six** cylinder powers and **three** base curves provide over 10,000 inventoried lens combinations.
- Recognized quality assures repeatability.

Find out for yourself why HydromarcTM (etafilcon A) is the preferred toric lens.

Let Us Help You Begin Your New Practice

The Bausch & Lomb New Practitioner Program

Congratulations Doctors! We hope to be your partner in eye care for years to come.

We know that having large fitting sets of contact lenses can give a new practice a big boost. However, acquiring the many types of lenses that are required to satisfy the vision requirements of your patients can be very costly. That is why we offer new practitioners a special no-cost trial lens program for our most popular lenses.

It's a combination program featuring consignments of Bausch & Lomb SOFLENS (polymacon) Contact Lenses (including bifocal lenses) and a SAMPLER set of BAUSCH & LOMB (hefilcon B) Toric Contact Lenses and BAUSCH & LOMB CW79 (lidofilcon B) Contact Lenses for aphakia. Here is how this program works.

After graduation you may receive on consignment your first 24 standard spherical lenses and your

first 24 bifocal lenses for no charge. Plus, we will send you our SAMPLER set of 24 Toric lenses and 10 CW79 lenses for aphakic extended wear for a six-month trial. At the end of six months, you can either buy the SAMPLER lenses at a reduced cost or return them without charge. You enjoy free use of the lenses with no financial risk.

This program provides you a total of 82 lenses for your new practice.

Additional lenses may be consigned for a small one time fee. You may participate in the Bausch & Lomb New Practitioner Program any time during the first 24 months after you graduate. Or, if you enter the military service after graduation, you'll be eligible for the program for 24 months after you leave the service.

When you're ready to begin your practice, call us, toll-free, at 800-828-9030. (In New York 800-462-1720, in Alaska and Hawaii 800-828-6291).

We'll have a Bausch & Lomb Professional Products sales representative contact you with all the details.

In Conclusion

In conclusion, we would like to acknowledge and thank Sharon Herlihy, the yearbook graphic designer, for her countless hours of work and dedication. Without her talent and expertise, this yearbook would have never reached publication.

To every reader, the 1984 yearbook staff has put forth much time and effort to suitably represent our four years together. We sincerely hope that we have not offended anyone and would like to apologize in the event that we have. And now, a look into the past...

Do you remember the Dean's Luncheon when he said that we would all get to know each other intimately? Well after four years I guess that is very true and for some, extremely intimate. Remember the great parties at Randy, Scott and Greg's apartment our first two years? What would finals have been like without plans for celebration?

Remember when Mariann's hair was long? Amigos was called Amigos? Marty's presence at an 8 o'clock lecture? What would a school screaming have been like without Susan Haldeman? The last time John Hlavity asked a question in class? Bannon sat in the front of the classroom? Remember when you had a patient in Aniseikonia (what?) Clinic? Will you remember CTI? When Ruth was meek and shy? Roger surviving a lecture without asking a question? Numerous quizzes?

The real meaning of WNL (we never looked). Disecting an eyeball? Looking at brain sections? Do you remember ever having any busy work? Nuclear Bill? Marcy and her AOSA plugs? BOBB? All the gunners? Creighton's Tables? Those sleepless weekends before a Hill exam?

It has truly been a great four years, so here's to the greatest class ever!
